

Finally a better option!

WiMAX

T1 Plus ONLY \$239.95/mo.

- [No local loop fees, taxes or intro rates]
- [Free Installation, usually within days]
- [Replace primary links or use as a backup]

WiMAX Business Internet Access

from AzulStar delivers carrier-class performance and reliability, up to half off our competitors' rates. We use our own licensed spectrum WiMAX network to deliver service without relying on the phone company, so you get more value for less cost. We guarantee our uptime and port speeds; there are no hidden fees; and installation is free, usually within a few days. Use AzulStar as your primary connection up to 1GB or as a Hot-Backup that will keep your business running smoothly even when your existing service goes down.

Business WiMAX Service

★ Faster Install Times

Typical installations occur within 1-2 weeks of an order being placed and are completed at no charge to customers.

★ Business-Class Services

We provide our business customers with >99.99% guaranteed uptime and 100% port speed along with a wide range of services such as Public IPs, managed on-campus Wi-Fi and inter-office private LANs.

★ Scalable Service

Service is available up to 1 Gbps full-duplex and beyond, often in remote areas. Speeds often can be scaled with just a phone call.

★ Traffic Prioritization and QoS

Mission critical services such as voice and video will always run smoothly due to our network capacity and intelligent traffic management, which provide full quality of service and end-to-end traffic prioritization.

Frequently Asked Questions

Why is AzulStar internet so affordable?

Our wireless network has been engineered to circumvent all wired Telco infrastructure, and we own and manage the entire network end to end. We achieve substantial savings that we pass along to our customers!

What is Fixed WiMAX?

Fixed WiMAX is a Fourth Generation wireless data network designed to deliver ultra-fast, secure Internet connectivity over long distances (up to 30 miles) and at speeds beyond 1 Gbps.

How are customers connected?

Customers are connected using one or more wireless modems which are professionally installed on the rooftop at no charge. Ethernet is then run from the modem to the customer router or data center.

What about interference?

AzulStar's WiMAX network operates using FCC-licensed frequencies which are not subject to interference. Redundant paths and links further increase speeds and reliability.

Is WiMAX service reliable?

Yes. Our network is designed for >99.995% reliability. When engineered properly, a WiMAX network will exceed the uptime of wired networks due to fewer points of failure and battery backup at all points of the network.

About AzulStar: Established in 2003, AzulStar Inc. is a privately held provider of 4G and 5G wireless Internet and communications services to commercial and government customers. Leveraging open-standards, wireless technology and an all IP wireless architecture, AzulStar delivers unprecedented levels of broadband performance and reliability. AzulStar has pioneered the market for wireless broadband access and won awards for the company's innovation and service quality. With carrier-class networks in the top markets of Michigan and New Mexico, AzulStar offers a variety of high-value services including high-speed Internet Access, managed wireless networking, and intelligent transportation.
